

Year 4 Maths - Spring Term 2 - Length and perimeter

Measurement vocabulary	
Measure	Perimeter
Estimate	Calculate
New Vocabulary	
Rectilinear	Convert
	Conversion

Perimeter

Perimeter is the total **distance** around the outside of a 2D shape.

Perimeter of rectangles

Find missing lengths in rectilinear shapes

The missing side is 10cm because $10 + 4 = 14$.

Perimeter = $9 + 14 + 6 + 10 + 3 + 4 = 46\text{cm}$.

Calculating perimeter of rectilinear shapes

Measure in km and m

- km** 1 kilometre = 1000 metres
- m** 1 metre = 100 centimetres
- cm** 1 centimetre = 10 millimetres
- mm**

Equivalent lengths (km and m)

	Distance between two cities	m (km)
	Length of garden	(m) km

Perimeter of polygons

perimeter of regular polygons = number of sides \times length of one side
