

Dean Field School

Computing Policy

Written: September 2019

Reviewed: June 2023

Review Date: June 2024

Introduction

This document is a statement of the aims, principles and strategies for the teaching, learning and assessment of Computing at Dean Field Community Primary School.

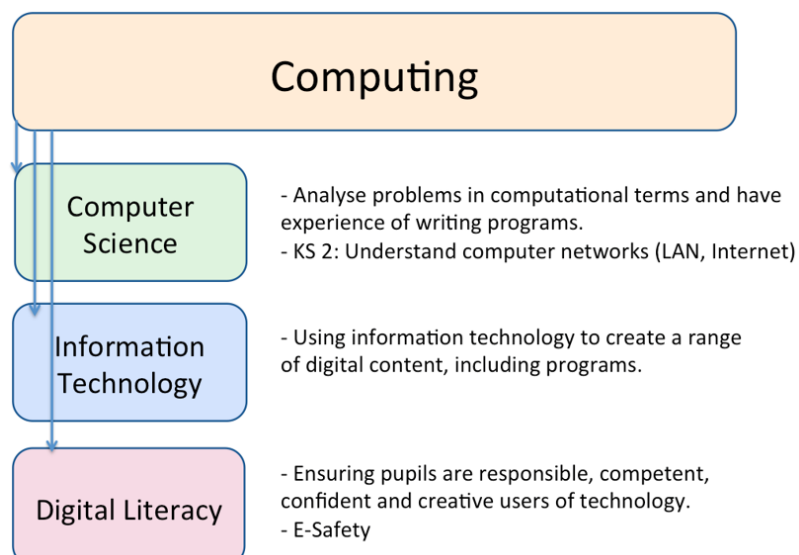

Intent

Each pupil at Dean Field has the right to a wealth of rich, deep learning experiences within the subject area of computing. As technology plays such a significant role in society today, we believe 'Computational Thinking' is a skill that children must be taught if they are to be able to participate safely and effectively in this digital world. The core of computing is Computer Science alongside basic skills. Pupils are introduced to a wide range of technology, including desktop computers, iPads, coding toys and interactive whiteboards, allowing them to continually practise and improve the skills they learn. This ensures they become digitally literate so that they are able to express themselves and develop their ideas through information and computer technology at a level suitable for their next step into high school and the future workplace as active participants in a digital world.

We teach a curriculum that enables children to become confident users of technology who can:

- Understand and apply the fundamental principles and concepts of Computer Science, including logic, algorithms and data representation
- Analyse problems in computational terms, and have repeated practical experience of writing computer programs in order to solve such problems
- Evaluate and apply information technology analytically to solve problems
- Communicate ideas well by utilising appliances and devices throughout all areas of the curriculum.
- Have the basic skills needed to be computer literate in an ever developing digital world

The Computing national curriculum is made up of 3 main components and is broken down into three elements- Computer Science, Information Technology and Digital Literacy.

Children access these components by using various skills, which are outlined in the progression document. Children also need to be computational thinkers to be successful computer scientists- the skills needed to be a computational thinker are outlined below.

Our Aims

Through our teaching of computing we aim to enable the children to become confident users of technology who can:

- Understand and apply the fundamental principles and concepts of Computer Science, including logic, algorithms and data representation
- Analyse problems in computational terms, and have repeated practical experience of writing computer programs in order to solve such problems
- Evaluate and apply information technology analytically to solve problems
- Communicate ideas well by utilising appliances and devices throughout all areas of the curriculum.
- Have the basic skills needed to be computer literate in an ever-developing digital world

Implementation: Planning

Computing is planned and sequenced in a curriculum designed specifically for our children. Code a Pillars, Beebots, Botley robots, Daisy the Dinosaur, Scratch Junior, and Purple Mash are used for programming in KS1 and move on to using Scratch and Makeblock Cody in KS2.

Teaching and learning

Computing is taught mainly as a standalone subject however links are made with other curriculum areas where possible. Children have a weekly computing lesson. These lessons take place in the classroom either using iPads, laptops, netbooks, Beebots, Code-a-pillars or doing 'unplugged' activities. There is a half termly timetable created each half term to indicate when each class are in the computing suite.

Children's work is evidenced and saved in one of 4 places-

- Purple Mash- children have their own accounts and their work on Purple Mash is saved in there
- Group Shared- Children have their own named folders in Group Shared drive on the school system. Any Office documents and Scratch files will be saved in here
- Seesaw- Children have their own folders in Seesaw that move with them year on year. Photos, screenshots, activities will be saved in the computing folder on here

Resources

All computing resources are stored centrally in a computing cupboard. Each class has a minimum of ten iPads to use. Sets of laptops and Chromebook can be booked out by teachers to use with their class. Electronic toys including are used in computing sessions and in provision in EYFS and KS1.

Computing curriculum planning

To support our computing teaching in school, we use 'Must Knows' to help children understand key facts about their computing topic. Key vocabulary is also displayed on the 'Must Knows' to work alongside our whole school focus on developing our children's vocabulary across the subjects. These are shared with children at the beginning of the unit and are saved on Seesaw so that they can be referred to as they go along.

Inclusion

Each child will be given the same opportunities regardless of ethnic group, age, gender, ability, social circumstances or SEND in the development of their computing education. Lessons are differentiated to extend children who are working at a greater depth or higher ability in computing. There is also a coding club, which will be aimed at children in KS2 who are high attaining in programming. Teachers are able to look at Crash Courses on Purple Mash to give to children who have missed previous teaching in particular units or need extra support. Lessons are adaptable and can be changed to suit the ability of the children in the classes. Lessons can be differentiated by outcome, support or with crash courses. The progression document can also be used to help differentiate- lessons can be adapted to teach the skills relevant to the specific children that require differentiation.

Assessment for learning

Children demonstrate their ability in computing in a variety of different ways and teachers assess accordingly. Teachers will assess children's work by making informal judgements during lessons to move forward each individual child's learning. On completion of a piece of work, the teacher assesses the saved work on purple mash and uses this to inform future planning. Written or verbal feedback is given to the child to help guide their progress. All children are encouraged to make judgements about how they can improve their own work. Once the children complete a whole unit of work, the teacher makes a summary judgement of work for each child in relation to the National curriculum objectives on Target tracker.

The progression document in computing is used as a tool for teaching and assessment. The progression document ensures that teachers are able to understand what has been previously been taught, what they need to teach in their year group and what will be taught next. It is also a tool for identifying any gaps in pupils' learning and allows teachers to plan for this effectively.

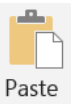

Monitoring and reviewing

The subject leader is responsible for monitoring the standard of the children's work and quality of teaching in computing, developing the assessment and ensuring progression and continuity within the subject. This is carried out through a combination of deep dives with SLT, monitoring of online folders and folders on the drive, learning walks, lesson visits and speaking to children and teachers. Additionally, the subject leader will support colleagues in their teaching, inform staff of any current developments in the subject and provide lead and direction for computing across school. The subject leader updates resources which are needed to deliver the computing curriculum, within budget restraints. There will be at least one deep dive per year in computing, where children's work is looked at in depth and some lessons will be observed.

Impact

Assessment and Feedback

Target Tracker is used to assess children against the bespoke statements from our computing progression document. Assessment is ongoing and will be updated half-termly on Target Tracker after each unit is completed. See the table below for the assessment statements for each year group.

Aspect	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Basic Computing skills (ICT)	Turn on a computer	Recall and do all previously learned skills	Recall and do all previously learned skills	Recall and do all previously learned skills	Recall and do all previously learned skills	Recall and do all previously learned skills
	Name the main parts of a desktop computer/pc	Find and open Microsoft Word	Find and open work from my own folder in pupil drive	Continue to improve accuracy and speed of touch typing	Find and open work from a friend's folder to peer assess (with their permission)	Create and name new folders
	Log in and log out	Use Save As to save work in their own folder on pupil drive	Find, open and save Microsoft Word and Microsoft PowerPoint	Find and open work from a friend's folder to peer assess (with their permission)	Rename a file in their own folder	Use shortcuts on the keyboard to work more efficiently in Word and PowerPoint
	Hold a mouse correctly	Save work on Purple Mash using Save As in their own folder	Change the colour, size and style of font in Word and PowerPoint	Print work	Insert shapes and pictures into a PowerPoint document	Ctrl x Ctrl b Ctrl u Ctrl a
	Single and double click the mouse	Remember their own username and password	Begin to touch type more accurately	Find and open Word, PowerPoint and Excel	Copy and paste using keyboard shortcuts	Use format painter
	Start to recognise where letters are on the keyboard	Use the keyboard on a device to add, delete and space text for others to read.	Use Undo	Right click the mouse in Word	Ctrl c Ctrl v	Format text using align, spacing dependant on audience
	Recognise that the cursor moves when I move the mouse	Use their knowledge of where the letters are on the keyboard to start to touch type	I can use appropriate keyboard commands to amend text on my device, including making use of a spellchecker.	Copy and paste items from one document to another using the buttons on the toolbar or the drop down menu	Use the snipping tool	Insert table and use data to create a chart/graph
	Know that the return key moves the cursor to the next line when I am word processing	Know the function of the delete and backspace key		Insert a picture to a Word or PowerPoint document	Create a PowerPoint including animations	
	Save work on Purple Mash from a 2Do and know where to find it	Use the Caps Lock key		Add bullet points or numbers to a list in Word or PowerPoint	Include transitions in a PowerPoint	
	Use the keyboard or a word bank on my device to enter text. (PM, Word)			Insert a shape into a Word document and change its size, colour and orientation	Use the shift key pressed with a letter to capitalise	
				Use ctrl Z to undo	Insert a table and add data	

Online Safety
(part of digital literacy)

<p>Recognise that there may be people online who could make someone feel sad, embarrassed or upset.</p> <p>Know when and how to speak to an adult I can trust and how they can help</p> <p>Give examples of when I should ask permission to do something online and explain why this is important.</p> <p>Explain how to behave online and why it is important to be considerate and kind to people online</p> <p>Recognise that information can stay online and could be copied</p> <p>Describe what information I should not put online without asking a trusted adult first.</p> <p>Understand that we can encounter things we like and don't like online as well as things</p>	<p>Explain how people may look and act differently online and offline.</p> <p>Discuss issues that might make someone feel sad, worried, uncomfortable or frightened and give examples of how they might get help.</p> <p>Understand the risks posed by people who might use technology to communicate with others they don't know offline</p> <p>Know who to ask before sharing things about themselves or agreeing to things online</p> <p>Know their right to deny their permission online, ways to ask for and give permission and understand how others would feel if permission isn't sought before sharing something about them.</p> <p>Name their trusted adults who can help if something happens online without consent or is incorrect</p>	<p>Explain what is meant by the term 'identity'</p> <p>Explain how people can represent themselves in different ways online and how someone might change their identity depending on what they are doing online</p> <p>Explain what it means to 'know someone' online and why this might be different from knowing someone offline.</p> <p>Understand why it is important to be careful about who to trust online including what information and content they are trusted with.</p> <p>Explain how someone's feelings can be hurt by what is said or written online.</p> <p>Explain the importance of giving and gaining permission before sharing things online</p> <p>Explain the need to be careful before sharing anything personal</p> <p>Demonstrate how to get help</p>	<p>Explain how online identity can be different to offline identity.</p> <p>Describe positive and respectful ways for someone to interact with others online and understand how this will positively impact on how others perceive them.</p> <p>Explain that others online can pretend to be someone else, including my friends, and can suggest reasons why they might do this.</p> <p>Describe strategies for safe and fun experiences in a range of online social environments</p> <p>Understand that some of the information about anyone online could have been created, copied or shared by others</p> <p>Describe ways people can be bullied through a range of media</p> <p>Explain why people need to think carefully about how content they post might affect others</p>	<p>Explain how identity online can be copied/ modified or altered.</p> <p>Demonstrate how to make responsible choices about having an online identity</p> <p>Explain that there are some people I can communicate with online who may want to do me or my friends harm</p> <p>Describe ways people may be involved in online communities and describe how they might collaborate constructively with others</p> <p>Demonstrate how to support others who are having difficulties online.</p> <p>Describe ways that information about anyone online can be used by others to make judgements about an individual and why these may be incorrect.</p> <p>Recognise that online bullying can be different to bullying in the physical world</p> <p>Identifies ways to report concerns and access</p>	<p>Critically evaluate online content relating to gender, race, religion, disability and culture</p> <p>Explain why it is important to challenge and reject inappropriate representations online.</p> <p>Explain how sharing something online may have an impact positively or negatively</p> <p>Describe the importance of respecting boundaries regarding what is shared online and how things shared privately online can have unintended consequences for others</p> <p>Explain strategies to protect their 'digital personality and online reputation'</p> <p>Explain how someone would report online bullying in different contexts</p> <p>Explain and give examples of what a 'hoax' is.</p> <p>Explain how and why some people may</p>
--	--	--	--	---	--

<p>which are real or make believe/ a joke</p> <p>Explain rules to keep safe when using technology both in and beyond the home</p> <p>Understand that passwords are used to protect information, accounts and devices</p> <p>Recognise examples of information that is personal to someone</p> <p>Explain why work children create using technology belongs to them</p> <p>Understand that work made by others does not belong to me even if I save a copy.</p>	<p>Understand that information put online about someone can last for a long time and can be seen by others</p> <p>Explain what bullying is, how bullying can make someone feel and how victims can get help</p> <p>Understand the difference between things that are imaginary, 'made up', or 'make believe' and things that are 'true' or 'real'</p> <p>Explain why some information I find online may not be real or true.</p> <p>Explains simple guidance for using technology in different environments and settings</p> <p>Knows how to use passwords to protect information, accounts and devices.</p> <p>Explain some rules for keeping personal information private</p> <p>Recognises that content on the internet may</p>	<p>from a trusted adult if we see content that makes us feel sad, uncomfortable, worried or frightened</p> <p>Give examples of how bullying behaviour could appear online and how someone can get support</p> <p>Demonstrate how to use key phrases in search engines to gather accurate information online.</p> <p>Explain the difference between a belief, an opinion and a fact and give examples of how and where they might be shared online.</p> <p>Describe simple strategies for creating and keeping passwords private.</p> <p>Describe how connected devices can collect and share anyone's information with others.</p> <p>Explain why copying someone else's work from the internet without permission isn't fair and what</p>	<p>Analyse information to make a judgement about probable accuracy and I understand why it is important to make my own decisions regarding content and that my decisions are respected by others.</p> <p>Describe how to search for information within a wide group of technologies and make a judgement about the probable accuracy</p> <p>Describe some of the methods used to encourage people to buy things online</p> <p>Understands that lots of people sharing the same opinions or beliefs online do not make those beliefs or opinions true.</p> <p>Knows the benefits and risks of technology that can be designed to act like or impersonate living things</p> <p>Explain what is meant by fake news</p>	<p>support both in school and at home about online bullying. Knows how to block abusive users</p> <p>Explain the benefits and limitations of using different types of search technologies</p> <p>Evaluate digital content and explain how to make choices about what is trustworthy.</p> <p>Identify ways the internet can draw us to information for different agendas.</p> <p>Knows ways to identifying when online content has been commercially sponsored or boosted</p> <p>Knows how 'stereotypes' are amplified and reinforced online</p> <p>Describe how fake news may affect someone's emotions and behaviour</p> <p>Demonstrate how to create a strong password</p> <p>Describe how many free apps or services may read and share private</p>	<p>present opinions as facts; why the popularity of an opinion or the personalities of those promoting it does not necessarily make it true, fair or perhaps even legal.</p> <p>Define the terms 'influence', 'manipulation', and 'persuasion' and explain how someone might encounter these</p> <p>Understand the concept of persuasive design and how it can be used to influence peoples' choices.</p> <p>Demonstrate how to analyse and evaluate the validity of facts and information online</p> <p>Explain how companies and news providers target people with online news stories they are more likely to engage with and how to recognise this.</p> <p>Describe the difference between online misinformation and disinformation</p> <p>Understand that information that is on a large number of sites</p>
--	--	--	---	--	---

		belong to other people.	problems this might cause	<p>Describe strategies for keeping personal information private, depending on context.</p> <p>Describe and know how to respond appropriately if online services seek consent to store personal information</p> <p>Knows what the digital age of consent is and the impact this has on online services asking for consent.</p> <p>Explain the need to consider who owns information online and whether I have the right to use it.</p> <p>Give examples of content which I must not use without permission from the owner</p>	<p>information with others</p> <p>Explain what app permissions</p> <p>Assess and justify when it is acceptable to use the work of others. Give examples of content that is permitted to be reused and know how this content can be found online.</p>	<p>may still be inaccurate or untrue</p> <p>Identify, flag and report inappropriate content</p> <p>Describe effective ways people can manage passwords and what to do if a password is shared, lost or stolen.</p> <p>Describe how and why people should keep their software and apps up to</p> <p>Describe simple ways to increase privacy on apps and services that provide privacy settings</p> <p>Describe strategies to help me identify and deal with content which targets people to gain money or information illegally</p> <p>Demonstrate how to make references to and acknowledge sources I have used from the internet.</p>
<p>Computer Science</p> 	Give instructions to a friend and follow their instructions to move around.
